

PROFESSIONAL SUMMARY

Full-Stack AI Engineer experience building and scaling production web/mobile apps. Expert in full Product lifecycle,architecture, and deployment. Proven success utilizing AI agents, automation (N8N), and modern tech stacks to drive 40k+ installs and optimize cloud costs. Highly adaptable developer, capable of mastering and deploying new Frameworks within days.

PROFESSIONAL EXPERIENCE

Founder & Lead Engineer — FutrDroid_Ai

Apr 2023

Founded and led a startup, scaling a portfolio of products to 40,000+ organic users via Product-Led Growth.

- [StudyUp](#): Engineered a student-centric sharing platform using **Flutter** and **Firebase** (Firestore/Auth) to implement an offline-first architecture, achieving **7,000 MAU** and a **4.1-star** rating (**160+ reviews on playstore**).
- [BaiN](#) (**Dating / Social Utility**): Profiles, matching algorithms, real-time chat, subscription payments. Implemented in-app purchases,generating 5 subscriptions at ₹1,000 each in the last month; achieved **5k+** total installs and a **3.7-star** rating.

Lead Full-Stack Engineer — Maid Service (Startup)

Jan 2026

- developed two interconnected apps (maids & users) sharing a single DB with simultaneous real-time sync, so maid onboarding flows straight into user profiles.

Lead Full-Stack Engineer — Tryme (Startup)

Feb 2026

- developed a fitness + wellness AI where people with mental illness or depression talk openly and get empathetic solutions tips and conversation.

Lead Full-Stack Engineer — Qumatsu (Startup)

Aug 2025 – Nov 2025

- Integrated **OpenAI TTS** and **Google Drive API** for real-time document processing; handled secure payments via **Stripe** and **Razorpay** integrations.

Sales & Operations Coordinator — INFINITI Inc

Dec 2020 – Dec 2021

- Managed e-commerce operations across Amazon and Flipkart; utilized **Zoho Books** and **Advanced Excel** to automate inventory tracking, invoicing, and logistics coordination.

Stack: GCP, CI/CD, Docker, PostgreSQL, Geofencing, GitHub, Vercel/Firebase, Polyglot, AI/ML, Android, Product Development & Designing, Payment Integration, and Ads Integration, java, python, kotlin, dart, js.

KEY ACHIEVEMENTS

- 40,000+ Organic Users:** Bootstrapped and scaled a multi-product portfolio via aggressive SEO and product-led growth.
- 7,000 Monthly Active Users (MAU):** Scaled StudyUp to **20k+** total installs,maintaining a 4.1-star rating with 160+ reviews.
- Monetization & Ads Strategy:** Engineered high-conversion revenue flows, including in-app subscriptions and ad integration, to drive consistent recurring revenue.
- Cost-Efficient AI Automation:** Architected automated content pipelines using **N8N** and LLM orchestration, bypassing high-cost API barriers to minimize operational expenses

TECHNICAL PROJECTS

- [GenAI Image-to-Narrative Pipeline](#) (Final Year Project): Built a multimodal pipeline (**BLIP-2, VITS, LangChain**) turning images into audio stories.
- [Industrial Safety Monitor](#): Created a real-time Computer Vision system for edge device PPE detection.
- [Recommendation Engine](#): Designed collaborative filtering comparing **Cosine, Pearson, and Jaccard metrics**.

EDUCATION & INTERNSHIPS

- [B.Eng in Artificial Intelligence & Machine Learning](#) | KNS Institute of Technology

2021 – 2025

 - [Wadhvani](#): CRM, IoT & Digital Marketing Strategy.

2024
 - [Global Core Tech](#): ML Intern (Order Prediction & Forecasting).

2023
 - [Indian Tech Key](#): Robotics & App Dev (Python, Arduino, TinkerCAD).

2022

HOBBIES

AI Research, Open Source Contribution, First-Principles Thinking, Rapid Prototyping, and System Architecture Design. Exploring new emerging tools in the LLM ecosystem.
